### **PROFESSIONAL SUMMARY**

Full Stack Developer with 7 years of experience, specializing in developing and maintaining web applications, back-end services, and SQL/NoSQL databases. Excelling in crafting dynamic, responsive interfaces focusing on UI/UX. Possesses a comprehensive skill set in both back-end and front-end and a commitment to staying current with industry trends. Actively seeking new opportunities and challenges.

### **Key Skills**

- |              |           |                           |
|--------------|-----------|---------------------------|
| • PHP        | • AWS     | • CSS                     |
| • JavaScript | • CLI     | • SaaS                    |
| • SQL        | • Laravel | • Tailwind                |
| • NoSQL      | • VueJs   | • UI/UX                   |
| • GIT        | • ReactJs | • Artificial Intelligence |
| • NGINX      | • HTML    | • Chat GTP APIs           |

### **PROFESSIONAL EXPERIENCE**

#### **Full Stack Developer**

**03/01/2022 - 02/11/2024**

#### **Upwork, Chicago, IL**

##### *Parser*

- Designed and implemented a multi-module architecture for the entire project.
- Built and delivered the app from inception to completion, providing the final product to the client.
- Parsed over 20,000 games individually using GPT chat for content generation, leveraging scraped data to dynamically build an equivalent number of pages.

##### *Gambler Web Application*

- Improved task efficiency, in a team of five individuals, by implementing cutting-edge Laravel technologies, resulting in a 40% reduction in allotted time for project tasks completion.
- Implemented dynamic page generation, boosting the site's search engine ranking and significantly improving SEO.
- Implemented advanced caching mechanisms, optimized query execution time, and conducted in-depth analysis of media data, resulting in a 20% improvement in Lighthouse metrics.

#### **Full Stack Developer**

**12/01/2019 - 03/01/2022**

#### **CUDEV, Kharkiv, UA**

##### *E-commerce template*

- Collaborated with a team of six individuals to develop a responsive e-commerce template from the ground up. The project involved managing a substantial user flow, implementing features such as comments, Google Pay, Apple Pay, PWA offline mode, reviews, and more.
- Achieved a 250% increase in sales following the initial implementation of the template.
- Successful implementation of this template on more than 10 online stores
- Conducted interviews, mentored new hires, and conducted code reviews, leading to significant improvements in productivity.
- Reduced release time by configuring the testing flow and implementing CI/CD.

##### *AWS Websites*

- Led a project for 50+ sites, enhanced management utilizing Google Sheets and CLI, resulting in a doubling of task speed.
- Developed over 30 new medium and small-sized websites, deploying them using AWS: EC2/WorkMail, and the LAMP stack.
- Implemented Certbot on the server side, achieving a cost-saving of over 35% for a specified number of sites. Subsequently, the finished product was transferred to another team.

#### **BackEnd Developer**

**03/01/2019 - 12/01/2019**

#### **Toucan Solutions, Kharkiv, UA**

##### *Warehouse Management SaaS Applications*

- Developed and implemented an MVC (Model-View-Controller) architecture-based framework following SOLID principles, that was shared as a Composer package and applied in various other projects.
- Wrote unit tests and automated tests, resulting in a 25% reduction in bug-related delays.
- Led a three-person team to build and successfully sell a product based on the created framework. The product was sold to four different clients and subsequently supported.

#### **Full Stack Developer**

**03/03/2018 - 03/01/2019**

#### **Freelancer.com, Kharkiv, UA**

##### *CMS GraphQL*

- Constructed a theme and multiple plugins, which formed the foundation for developing a fully editable WordPress backend. Integrated a fast-responsive React JS frontend, establishing seamless communication through GraphQL between the two.
- Reduced the application size by 4 times through strategic modifications and smart webpack configurations.
- Fully configured two domains for production and pre-production, implementing full automatic and functional testing before deployment.

## **EDUCATION**

**Master of Science (MS),**      **computer science,**  
Demyanchuk UA,
